What are the risks of investing?

Risk indicator for the International Fixed Interest Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 31 December 2017 to 31 December 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the Private Wealth Series Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

Notes

1. The total fund charges uses an estimate for 'other management and administration charges' which reflects the costs and expenses charged by Russell Investment Management Limited (Russell), the underlying manager of the Fund as at 31 March 2021. Russell was terminated as manager of the Fund on 28 July 2021, and costs and expenses charged by Russell ceased from that date. The estimate was based on verification from the underlying manager to BNZ Investment Services Limited as manager of the Fund.
2. The percentage of cash and cash equivalents in this graph may differ to those stated in the Top 10 investments table as they can include operating and fund accruals.
3. Investor flows not yet unitised, unsettled trades, currency hedging gains (or losses), collateral positions held for derivative or hedging purposes, and any operating accruals, are excluded from the Top 10 investments.
