

# International Equity Fund

## Private Wealth Series

## Fund Update

For quarter ending 30 September 2024

This Fund Update was first made publicly available on 24 October 2024.

### What is the purpose of this update?

This document tells you how the International Equity Fund (Fund) has performed and what fees were charged. The document will help you to compare the Fund with other funds. BNZ Investment Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this Fund

The International Equity Fund invests in international equities primarily in developed markets, with the ability to invest to a lesser extent in emerging market countries. It aims to provide a gross return in excess of its benchmark index, over the long term.

Total value of the Fund	\$673,166,252.90
Date the Fund started	8 March 2017

### What are the risks of investing?

#### Risk indicator<sup>1</sup> for the International Equity Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz](http://sorted.org.nz)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 30 September 2019 to 30 September 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the Private Wealth Series Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

### How has the Fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	9.14%	23.51%
Annual return (after deductions for charges but before tax)	10.53%	25.97%
Market index annual return (reflects no deductions for charges and tax)	11.68%	27.68%

The market index (benchmark) return is currently based on the MSCI All Country World Index (60% hedged to New Zealand dollars). Additional information about the benchmark is available on the offer register (search for Private Wealth Series) at [companiesoffice.govt.nz/disclose](http://companiesoffice.govt.nz/disclose)

## Annual return graph

The graph shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the average annual return since the Fund started, up to 30 September 2024.

Important: This does not tell you how the Fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

Market index returns do not include Fund charges or deductions for tax.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

John had \$10,000 in the Fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after Fund charges were deducted of \$2,351.00 (that is 23.51% of his initial \$10,000). John also paid \$0.00 in other charges. This gives John a total return of \$2,351.00 for the year.

## Notes

1. Because the risk indicator is calculated using the past 5 years' worth of returns, in periods of high return volatility the risk indicator is more susceptible to change from time to time.
2. The calculation of cash and cash equivalents within the actual investment mix allocation may include investor flows not yet unitised, liquidity cash and fund accruals but excludes cash and cash equivalents held by our investment managers for operational and hedging purposes which are categorised within the asset class to which they apply.
3. International equities may include an allocation to Australasian equities and listed property securities.
4. Investor flows not yet unitised, unsettled trades, currency hedging gains (or losses), collateral positions held for derivative or hedging purposes, and any operating accruals, are excluded from the Top 10 investments.
